Read further to get a better understanding of what is part of this release.

New and enhanced features

Enhancements in the Projects User interface

The users would now see the new UI for the file page that shows all the evidence attached within the projects. The users will see evidence in the Images, Files and Links tabs separately. They will also be able to delete any evidence at any point before submitting the project. Teachers, School leaders, Instructional Leaders, and Program managers.

Enhancement in the Program User interface

On the program page users can now view resource type to identify the resources of the program. On the tasks page, users can now add files as an evidence to a task at any point in time irrespective of task status. Users can also share the details of the project from the project page.

Teachers, School leaders, Instructional Leaders, and Program managers

Enhancement in Observations User interface

In Observation section the users can add and customise the entity (school, block, district, etc.). The users will, thus, Add School or Add block with other details, making it more contextual and easily understandable.

Enhancement to the Program Dashboard

The users will now experience more intuitive and uniform User Interface. The addition of a few optional filters will also help the users to generate datasets apt for their needs by filtering data as per requirement. State admins, Program managers and designers

Enhancement in Task detail report

The users will now have the following two changes in the task report for projects available on the program dashboard:

The users will see project evidence links uniquely. No repetition will occur due to the task details. This will ease access to the project evidence data.

The remarks for tasks will come up only once now. Thus, the users will have a decluttered report with better readability. State admins, Program managers and designers

Issues Resolved
